Hasan Syed

Computer Science Student @ ASU

Education

Arizona State University

- Computer Science B.S. | Estimated Dec. 2028 Graduation
- GPA: 3.94

Projects & Experience

Personal Homelab – Dockerized Media & Self-Hosted Services

- Deployed and maintained 10+ containerized services (Plex, Jellyfin, Sonarr, Radarr, Prowlarr, Jellyseerr, Immich,

Vaultwarden, Kavita, Komga, etc.) using Docker Compose on a Windows/WSL2 Ubuntu environment, supporting 9 users and a 20TB media library.

- Configured Nginx Proxy Manager with Let's Encrypt HTTPS and Cloudflare Tunnel (cloudflared) for secure remote

access; managed port forwarding and Docker networking for service availability.

- Administered the Linux/WSL2 environment, including container volumes, networking, service dependencies,

updates, and troubleshooting across the self-hosted stack.

- Monitored service usage and streaming activity with Tautulli, using operational data to track system utilization.

hasansyed.dev – Serverless Portfolio

- AWS S3 + Cloudfront
- DNS configured in Cloudflare
- Implemented a visitor counter with API Gateway, Lambda, and DynamoDB
- Frontend written in HTML w/ CSS

Lumira – Media Review Aggregator

- Aims to compile all reviews from a variety of media reviewing sites for local storage on host computer.
- Containerization with Docker
- Planned CSV import feature from Letterboxd, Hardcover, and Goodreads.
